

Carbon Reduction Plan 2024

Supplier Name: **CJ Medical Limited**
Publication Date: 28.02.2024
Reference: CJM-10-016, version 1

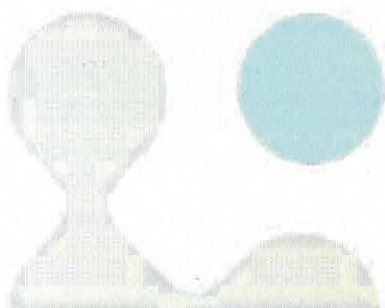

CJ Medical is committed to achieving Net Zero emissions by 2050 or sooner.

Baseline Year: 2023

(CJ Medical has not previously assessed or reported emissions; therefore, the baseline is for the first reporting year, 2023)

Baseline / current year emissions:

EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	1.4 Tonnes
Scope 2	0.2 Tonnes
Scope 3 (Partial Monitoring)	673 Tonnes
Total Emissions	677 Tonnes CO ₂ e

Innovators. Educators. Facilitators.

To continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 609.3 tCO₂e by 2030. This is a reduction of 10%

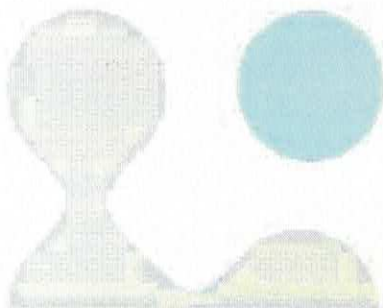

- Installation of Mezzanine Flooring, negating the need for a second storage premises.
- Introduction of rotating Hybrid or Fully Remote working
- Introduction of consolidated international freight
- Meetings, Education and Training
 - 50% reduction in travel by utilising video conferencing

Progress against these targets will be measured annually from the baseline year of 2023.

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since 2015.

- 75% Electric Fleet (EV fleet policy).
- Reduction in travel. Transitioned from face-to-face workshops to online in 2022.

Innovators. Educators. Facilitators.

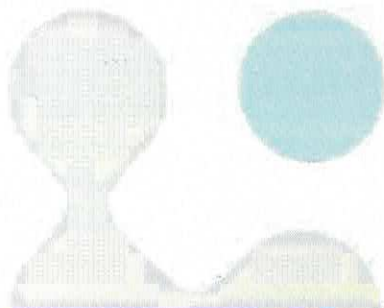

- Outsource transport and logistics with sustainable initiatives
- Implementation of Suez Recycling and Recovery UK Ltd
- CJ Medical Limited operates from a BREAM specification site in Truro, Cornwall. Combined solar and grid power. Reduction of power through LED lighting and timer-controlled heating.

In the future we aim to implement further measures such as:

- 100% electric fleet
- Transition from air to sea or rail freight.
- Implement sustainable packaging.

This Carbon Reduction Plan has been completed in accordance with **PPN 02/23** and associated guidance and reporting standard for Carbon Reduction Plans. Emissions have been recorded in accordance with Normative's Business Calculator for carbon reduction plans using the appropriate Government emission conversion factors for greenhouse gas reporting.

Our primary focus has been on reducing our combined Scope 1 & 2 emissions. We are also committed to measuring and reducing our scope 3 emissions in the future. This includes constant evaluation of the carbon-saving activities of our top 3 suppliers and our selection process of transport & logistics providers and their pathway to net zero by 2050.

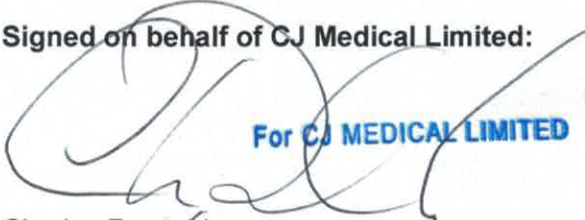

Innovators. Educators. Facilitators.

Our emissions have been calculated and recorded in accordance with the published reporting standard for Carbon Reduction Plans. We currently do not report results but are exploring SECR software reporting methods within the next few years.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
